**pcoc.edge 4.2 bi**

cooled sCMOS camera

- **Deep cooled**: down to -25 °C
- **Up to 95% quantum efficiency**
- **Compact design**
- **Resolution**: 2048 x 2048 pixel with 6.5 µm pixel size
- **Back illuminated sCMOS sensor**
- **Input windows selectable**

**Lightsheet scanning mode**

**Low light mode**

*1288 EMA Standard Compliant*

*An Excelitas Technologies Brand*

¹ Selectable via SDK (software development kit).
² The readout noise values are given as median (med) and root mean square (rms) values, due to the different noise models, which can be used for evaluation. All values are raw data without any filtering.
³ Based on image sensor datasheet.
low light mode

When the low light mode is activated, both the high and low gain A/D converter are used as high gain, which means they digitize low intensity pixel values only.

The signal within each pixel is simultaneously digitized by two separate A/D conversion units and added up, which is referred to as correlated multi sampling (CMS). This correlation causes a major reduction of the readout noise, though the usable intrascene dynamic range of the sensor is reduced.

lightsheet scanning mode

The PCO lightsheet scanning mode is a special readout mode dedicated to lightsheet microscopy. It is based on the rolling shutter mode in which the readout direction of the sensor is from top to bottom.

The standard line time value is 12 μs and it can be set from this camera-specific line time up to 2 ms. Compared to the standard operation mode, the lightsheet scanning mode enables the selection of the parameters “Line Time” and “Exposure Lines”. This guarantees an optimized synchronization to an existing lightsheet setup which has no selectable speed or timing. It is possible to set a delay prior to the exposure start (“delay lines”).

For more information on the corresponding SDK functions, please read our pco.sdk instruction manual.
**Technical Specifications**

**Camera System**

- **Maximum Frame Rate**
  - Full resolution: 40 fps

- **Exposure/Shutter Time**
  - 10 µs to 20 s

- **Dynamic Range A/D**
  - 16 bit

- **A/D Conversion Factor**
  - 0.8 e−/DN

- **Pixel Scan Rate**
  - 46.0 MHz

- **Pixel Data Rate**
  - 184.0 Mpixel/s

- **Binning Horizontal**
  - x1, x2, x4

- **Binning Vertical**
  - x1, x2, x4

- **Region of Interest (ROI)**
  - Horizontal: steps of 32 pixels
  - Vertical: steps of 8 pixels

- **Non-linearity**
  - < 0.6%

- **Cooling Method**
  - Adjustable: from -25 °C to +20 °C
  - Peltier with forced air (fan) and water cooling
  - Calibration setpoint: -10 °C

- **Trigger Input Signals**
  - Frame trigger, acquire (SMA connectors)

- **Trigger Output Signals**
  - Exposure, busy (SMA connectors)

- **Data Interface**
  - USB 3.1 Gen 1

- **Time Stamp**
  - In image (1 µs resolution)

**General**

- **Power Delivery**
  - Power over USB 3.1 Gen 1 and power connector (24 VDC +/- 10%)

- **Power Consumption**
  - Typ. 4.5 W over USB 3.1 Gen 1 and typ. 10.0 W (max. 22.0 W) over power connector

- **Weight**
  - 920 g

- **Operating Temperature**
  - +10 °C ... +40 °C

- **Operating Humidity Range**
  - 10% ... 80% (non-condensing)

- **Storage Temperature Range**
  - -10 °C ... +60 °C

- **Optical Interface**
  - F-mount, C-mount

- **Maximum Cable Length**
  - 5 m

- **CE / FCC Certified**
  - Yes

- **Trigger Input Signals**
  - Frame trigger, acquire (SMA connectors)

- **Trigger Output Signals**
  - Exposure, busy (SMA connectors)

- **Data Interface**
  - USB 3.1 Gen 1

- **Time Stamp**
  - In image (1 µs resolution)

---

*The high dynamic signal is simultaneously converted at high and low gain by two 12 bit A/D converters and the two 12 bit values are sophisticatedly merged into one 16 bit value.*
**Technical Specifications**

**pco.edge 4.2 bi**

**Input Windows**
- Selectable input windows available

**VIS+ Input Window**
- Wavelength [nm]: 200, 300, 400, 500, 600, 700, 800, 900, 1000, 1100
- Transmittance [%]: 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100

**Sensor**
- Quantum efficiency [%]:
  - Wavelength [nm]: 200, 300, 400, 500, 600, 700, 800, 900, 1000, 1100

**UV+ Camera**
- Quantum efficiency [%]:
  - Wavelength [nm]: 200, 300, 400, 500, 600, 700, 800, 900, 1000, 1100

brightfield microscopy microscopy | fluorescence microscopy | digital pathology | single molecule localization microscopy | lightsheet fluorescence microscopy (LSFM) | calcium imaging | FRET | FRAP | structured illumination microscopy (SIM) | high-speed bright field ratio imaging | high throughput screening | high content screening | biochip reading | TIRF microscopy | spinning disk confocal microscopy | 3D metrology | ophthalmology | photovoltaic inspection | industrial quality inspection | lucky astronomy | bio luminescence | chemo luminescence

» software

With pco.camware you control all camera settings, the image acquisition and the storage of your image data. The pco.sdk is the complementary software development kit. It includes dynamic link libraries for user customization and integration on Windows-PC platforms. Drivers for popular third party software packages are also available for you.

All this items like pco.camware, pco.sdk and third party drivers, are free-to-download at www.pco.de
